

Hristijan Ristovski

My background as a Software Developer, along with my education in Computer Science, have allowed me to attain a good foundation of technical skills. In addition to my Web Development skills, I also possess a good eye for design. I am good at HTML, CSS, Less, Bootstrap, Javascript, JQuery, and the accompanying with each of these technologies like C#, Node.js, Angular 2 and etc. Also i am Student of the Faculty of Computer Science and Engineering (FINKI) - "Ss. Cyril and Methodius University of Skopje". In addition to my knowledge base, I actively seek out new technologies and stay up-to-date on industry trends and advancements. Interested in innovations and new technologies. Also Interested in working in a team, as well as having individual responsibilities. Willing to help, listen and learn. Excellent communication skills in English and middle knowledge in German.

SKILLS

PROJECTS

[LINK TO GITHUB:](https://github.com/hristijan2509) <https://github.com/hristijan2509>

➤ SD card encryption (TWR-k40X256 freescale hardware)

- One time (faculty) project
- programming microSD card (encryption) on hardware
- worked on creating security encryption for SD card defined from assistant that need to be done with embedded

➤ Smart Calculator

- smart calculator with custom formulas, using Javascript ES6, HTML, CSS
- formulas was given by client, design is created by me using my creativity depending on their website flow and view
- making mathematical calculations and show the result on number change(real time calculations)
- make dollar format, parsing values

➤ Web Service

- description: web application working using Nodejs, Angular 2, sequelize, postgresSQL
- flow: application that work trough secure network and read some information from website
- worked on backend with Nodejs, creating user rules, table with CRUD informations from backend
- worked on login form and admin panel using templates with Angular 2, based on design from designer

➤ **Web scrapper**

- using library cheerio.js for scraping data from other websites
- server created with Nodejs & Express for backend
- frontend view was made with Reactjs using HTML and CSS, only to show the data into table scraped from website

➤ **Web chat**

- web application for chat using mongoDB and Nodejs for backend and Angular 4 for frontend
- chat application for communication (real time) between few users
- messages and users saved(logged) into database

➤ **Simple messenger with socket.io**

- Web application using Nodejs and Reactjs
- chat application for communication (real time) between few users
- simple web chat application using Reactjs for Frontend
- Nodejs for backend with latest feature of JS(Ecmascript 6)

➤ **Online Shop**

- online shop for buying perfumes using HTML, CSS, Javascript designed by me
- e-commerce website using cookies
- creating list for all products and shopping card for selected
- price calculations and payment

➤ **Webpage for Search Engine**

- developed clear look landing pages, using my creativity with confirm of Team lead
- implementing API calls from other websites using .NET
- adding verifications for given information
- making Dashboard from Scratch with widgets and calculations
- adding clickable 3D Map with navigation

➤ **Bitherium Portal**

- creating web project for cryptocurrency , implementing strype payment for buying and exchange bitcoins
- created all website design views from scratch, and implemented with ReactJs based on the mock designs created by the design team and developed to me into (www.zeplin.com)
- Js validations and navigations
- image/ logo editing with Photoshop
- testing application with already defined flow by Team leader

➤ **Web Design**

- Developed code in HTML, CSS, Bootstrap based on the designs created by the design team
- full responsive website
- functionalities and validations using (Javascript, JQuery)
- communicated with the design and QA team

➤ **E-Commerce**

- Developed E-commerce web application, using Devexpress for Frontend, and C# for Backend
- Implementing Interface for uploading photos, creating directories
- CRUD operations using C# with SQL
- Make responsive for any device, using CSS and Devexpress controls
